Community Leaders Call on EPA to Remove Toxic Soil from Allied Site

Dear friends,

- Michigan United on the web
- Like us on Facebook

Tomorrow at noon, city officials, community leaders and Edison neighborhood residents will call on the Environmental Protection Agency to do a full removal of the soil contaminated with PCBs from the Allied site. The EPA is proposing to leave this pile of soil in the heart of our city, above one of our aquifers.

DONATE NOW

We need to stand up to the EPA and tell them that our neighborhood is no place for toxic waste.

Join us for a press conference tomorrow at 12 p.m. to tell the EPA we want clean water and soil, not a poison dump.

Place: Heritage Community of Kalamazoo, 2400 Portage Road

Time: 12pm

Date: TOMORROW, April 19th

Directions: Turn onto Phillips and then take the second left onto Golden. There is a sign that says "Heritage Hills." We are meeting at the bottom of the hill, where the property borders the Allied site.

The press conference will start at 12 p.m. tomorrow, so try to be there at least fifteen minutes beforehand.

Want to know more about what's happening? Join us Monday at Western Michigan University for a teach in about this issue -- **"PCBs, the EPA, and Kalamazoo's Drinking Water."** City officials, elected representatives, and specialists in hazardous materials will talk about the EPA's plan.

Place: Western Michigan University Bernhard Center

Date: Monday, April 22nd

Time: 7-9 p.m.

Make your voice heard on this important issue!

Best,

Meredith
